Tank Saver Warranty Contract

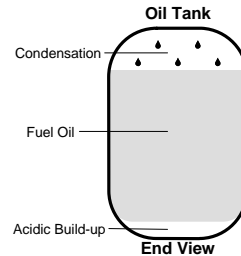

Tank Saver Oil Tank Protection Program Warranty Details

While your eligible above-ground heating oil tank (maximum capacity 330 gallons) is treated with Tank Saver, Holliston Oil Service, Inc, provides the following limited warranty for one year from the date of invoicing: If during this period your aboveground tank leaks from internal corrosion which **Tank Saver** has failed to prevent, you will be eligible to receive a new replacement tank per the details below. Leak verification is required.

1. Holliston Oil Service will remove and replace the faulty tank. The fire-omatic valve, tank gauge and vent alarm will be replaced if needed at no extra charge.
2. The cost for permits, changes required by current safety codes (such as new fill or vent pipes, new oil supply lines, or oil safety valves), difficult to access or other unusual circumstances will be billed to you. You will be responsible for providing access to a tank that has been enclosed or built in, or where there is not adequate clearance to move the tanks in or out of the building.

How Tank Saver Works

Tank Saver, a safe, effective liquid concentrate, is easily poured into the tank once a year during a regular oil delivery or service call. It reacts only with the acidic moisture condensate in the tank bottom – precisely where the problems occur. It will not harm fuel efficiency or performance.

Terms and Conditions

The above is your exclusive remedy. Leaking tanks, which have been repaired and underground tanks are not eligible and are excluded. To be eligible for inclusion in this program, you must be an automatic delivery customer with account in good standing. Tanks must be inspected by Holliston Oil Service before enrollment in the program.

Holliston Oil Service has no liability for environmental cleanups or for any other incidental or consequential damages. To the extent permitted by law, there is no warranty of merchantability or other implied warranty. Any claim for breach of warranties must be brought during the one year period or within 90 days thereafter.

Oil leaks can pose serious safety and environmental hazards, so we recommend that you check your tank regularly and call your oil dealer at the first sign of a tank leak.

Please sign and return this form authorizing the application of the Tank Saver program to your account.
